Exam prep is the most accurate predictor of whether you are ready for the actual licensing exam. This course consists of two full-length practice exams and two content review sessions. Each practice exam consists of the same two portions you will face on the actual licensing exam (a national portion and a state portion).

In this course, you will review the principles of real property law, land use controls, environmental issues, and how real property is legally described. You will also review the rights and interests you receive in real property as an owner or a tenant, how they are properly recorded, and how ownership is transferred. From the basic principles of contracts to financing, you will cover it all.
